INSTALLED PLAN VIEW

Finished
Dimensions: 44"L X 44"W X 12"H

INSTALLATION NOTES

1. Familiarize yourself with the construction details shown on this page.
2. Mark out the location for your fire pit. Note dimensions shown are nominal so mark an area slightly larger than shown.
3. Excavate for drain stone base (approx. 6")
4. Fill excavated area with drain stone, level, and compact.
5. Place blocks according to the installation detail (measure across the diagonals to ensure squareness)
6. Once all blocks are laid out, place the steel liner into the center opening. It will rest atop the blocks.
7. Fill the firepit opening with additional drainstone 1" above the bottom of the liner to secure it into place.
8. **WARNING! Do not place the fire pit directly atop a patio surface. Instead, the fire pit should be "cut in" to the patio surface to avoid damage to the patio caused by conductive heat transfer.**

Dimensional Fire Pit Kits are also available in gas-burning and Breeo® smokeless wood-burning configurations.

TYPICAL INSTALLATION

- A. Dimensional Wall Blocks (overlap at corners as shown)
- B. 12-gauge steel ring (28"x28" opening), 12" tall, hangs directly on blocks
- C. 6" minimum drainstone base underneath
